

### **Fera Pharmaceuticals is Now Shipping Bacitracin Ophthalmic Ointment, USP**

NEW YORK-January 15, 2010/BusinessWire/-Fera Pharmaceuticals is pleased to announce that Bacitracin Ophthalmic Ointment, USP is now available through wholesalers, chain, independent and hospital pharmacies.

In July 2009, Fera acquired all rights and title to seven ophthalmic ointments, including Bacitracin. Product supply has been an issue since then, as the previous owner had discontinued manufacture of Bacitracin and only a limited quantity was made available during the transition to Fera.

“The company has been diligently working to transfer manufacturing of these products in order to meet market demand for these important sterile anti-infective ointments” says Frank DellaFera, President of Fera.

Bacitracin Ophthalmic Ointment, USP is the first product transfer to be completed. It is anticipated that the transfer of Erythromycin Ophthalmic Ointment will occur in the next few weeks at which point Fera would ship immediately.

The manufacturing transfer for the balance of the line is underway with availability projected later in the year.

#### About Fera Pharmaceuticals, LLC

Fera Pharmaceuticals is a privately held company. The company goal is to realize opportunities via acquisitions, in-licensing, developing and marketing abbreviated new drug applications (ANDAs), new drug applications (NDAs) and 505(b)(2) NDA products. Areas of interest include products that could benefit from lifecycle management with a special focus on niche markets. For more information visit [www.ferapharma.com](http://www.ferapharma.com).
